

STUDENTS AT RISK

Tableau Accelerator built by Datatelligent

Identifying at-risk students early on is critical for any higher education institution looking to intervene and provide targeted student support. This proactive intervention leads to improved student retention rates and a more satisfied student body.

Student Data at Your Fingertips

Rather than building custom reports from the ground up, Datatelligent has partnered with Tableau to help higher education institutions identify students at risk for retention outreach.

With just-in-time information at your fingertips, via the Tableau Accelerator built by Datatelligent, institutions can quickly identify opportunities to enhance much-needed student support and improve the student experience.

We Can Help You Easily Tap Your Data

By integrating data into our Data Analytics as a Service (DAaaS) solution, we give you insights laser focused on student success and retention.

Our Solution

The Tableau Accelerator built by Datatelligent can help your higher education institution leverage data analytics more effectively for improved student success and retention.

Together, we can help you use data to:

- Identify students who are encountering obstacles for continued enrollment
- Flag students for retention outreach who fall into a risk category
- Recognize enrollment, retention, and course-specific trends
- Cultivate a mission-appropriate higher education student body
- Build a culture that supports students from recruitment and admissions, to enrollment, student life, and beyond

ABOUT US

Datatelligent gives data purpose.

We enable the use of data to make our communities better.

Our mission is to use our unique approach, Data Analytics as a Service (DAaaS), to help remove barriers for organizations to make data-driven decisions.

Our industry focus includes:

- Higher education
- Human services
- Faith-based organizations

At-Risk Metrics

The Tableau Accelerator built by Datatelligent can help higher education institutions track and breakdown the factors that contribute to a student being a higher risk for retention.

Imagine easily accessing the following student metrics in one place with one streamlined view.

- Retention risk factors
 - Grade Point Average (GPA)
 - Academic probation
 - Student type
 - High school diploma status
 - SAT/ACT score
 - First generation college student
 - Hold codes
 - Academic disadvantage status
 - Full/part time status
 - First time student
 - Late registration
- Learning Management Systems (LMS) measures
- Filters to see at-risk scores by student characteristics such as major, year/term, and first time/transfer status
- Detailed risk information for specific students
- Student totals
 - Full and part-time students
 - First time vs transfer
 - Traditional vs non-traditional students
- Ability to customize and add risk factors per institution's needs
