

▪ DATATELLIGENT PLATFORM

▪ For Higher Education

▪ Unified Data Solutions

▪ Unify data seamlessly from multiple source systems and third-party data into a single Data Lake for easy access. Our automated Data Pipelines provide data updates from sources on a regular basis. Integrated Data Sets with pre-defined key metrics feed interactive analytic solutions.

▪ Analytic Solutions

Interactive, visual solutions with key metrics and trends to enable data-driven decisions. Our Student Lifecycle Suite includes insights into the entire student journey, including Enrollment Trends, Students-at-Risk, and Student Success. Additional solutions include Budget Forecasting, Student LMS Engagement, and Admission Funnel as well as AI-driven solutions.

▪ Data Team

Use our team of experts for custom development projects including customer defined projects, custom data lake or analytic solutions, and advisory services such as Data Analytics Maturity Roadmap and AI Readiness and Roadmap.

Our Platform

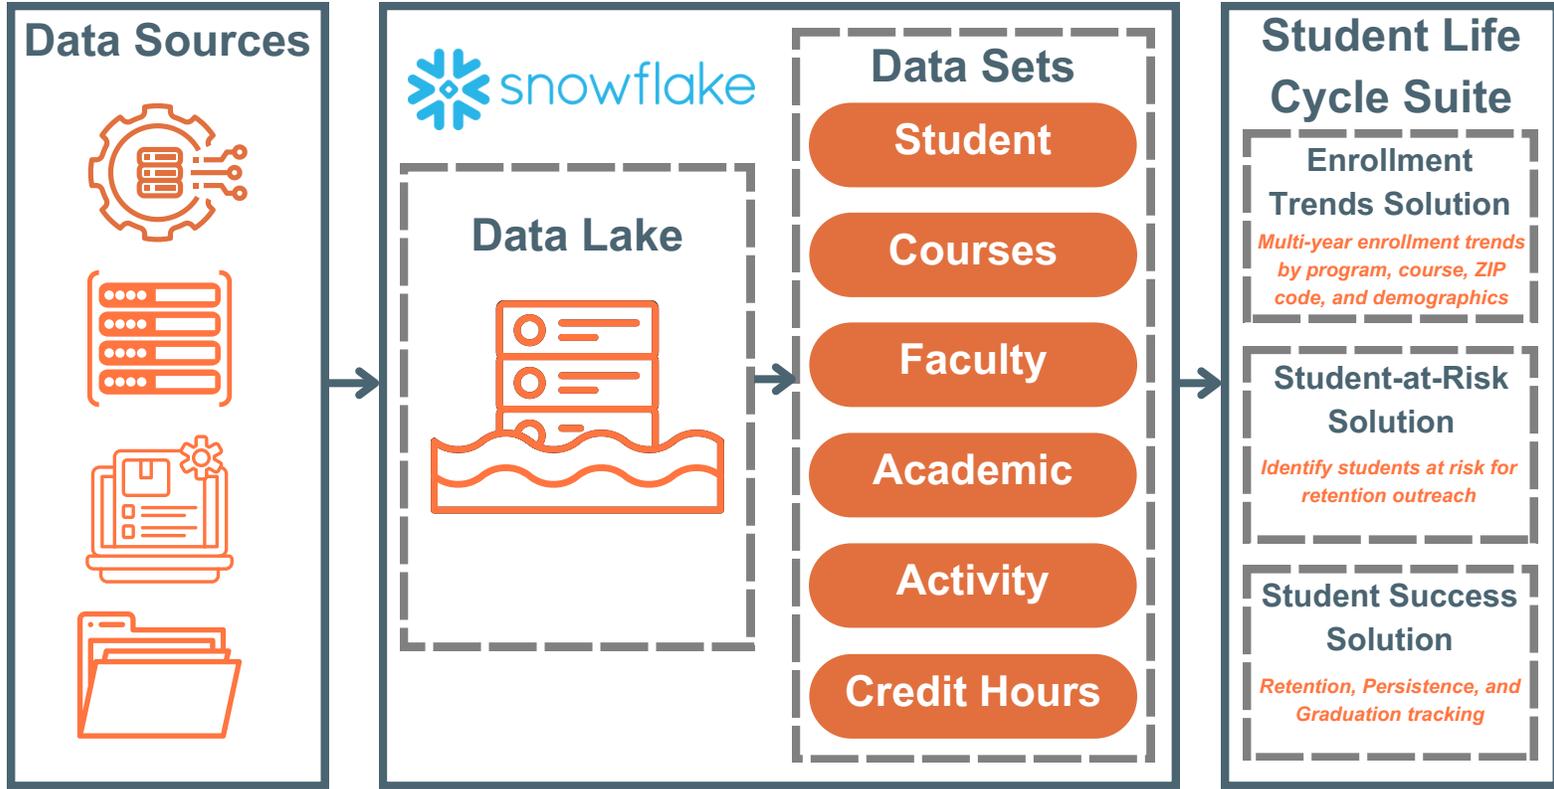

Our Platform combines the power of the Snowflake Data Cloud with the Datatelligent Data and Analytic solutions to provide your institution with the tools to help students through their journey

Together, we can help you:

- Access a unified data platform for a single source of truth for data across your institution
- Identify enrollment opportunities by analyzing multiple years of enrollment trends by program, course, demographics, and census metrics
- Identify students at risk for retention for early outreach and support
- Track student success through retention, persistence, and graduation tracking

Datatelligent Platform

End-to-end solutions for Your Data and Analytic Needs

- Using the power of Snowflake, data from your source systems and third-party sources can be combined into one location to serve as the single source of truth on campus.
- Datatelligent Datasets are customized based on your needs to help track the metrics that are most important to you.
- The Datatelligent suite of Analytic Solutions helps to bring the data to life, from enrollment trends, to identifying students at risk to tracking student success.

Datatelligent

Datatelligent gives data purpose.

We enable the use of data to make our communities better.

Our mission is to use our unique approach, Data Analytics as a Service (DAaaS), to help remove barriers for organizations to make data-driven decisions.
